EYFS - Number

Count reliably with numbers from 1-20

For 1:1 counting, number sounds are clearly separated and items counted with exaggerated movements. Counted objects are rearranged in regular patterns to support quantity recognition.

Children learn that each object is counted once and the last number is the total for the set— count small sets in irregular arrangements. Progress by counting out items from larger set; objects that can't be moved; make objects not visible once counted; count movements and sounds. Counting on taught by counting two sets, then screening one of the counted sets.

Identify and use numerals

Children match numerals to different representations of number for quantities 1-10 (see 'knowledge of numbers as quantities') e.g. making and finding 5 in different ways. Children learn that 'teen' represents 10 and match teen/ten visual cards. Place value arrow cards used for partitioning and combining tens and units.

Understand 10 as a unit

Items are counted into groups of 10, for example pipe cleaners bundled into 10s or items counted into 10-frames. Children recognise quantities in multiple 10-frames as 'how many tens, how many ones'.

Children count tens/ones on Slavonic Abacus. Coloured 100-square supports counting in tens.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

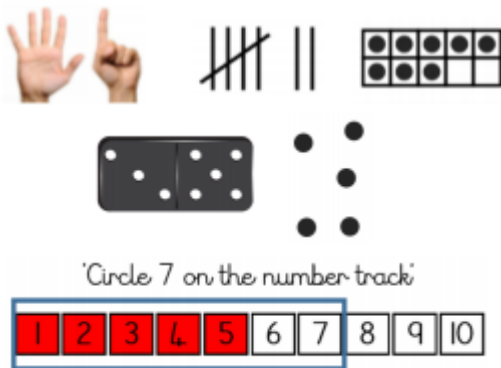

EYFS - Number

Secure knowledge of numbers as quantities

Children instantly subitize 1-3 items through dot pattern games and everyday experiences. Items may be unrelated.

A range of representations used for quantities 1-10. Children show numbers in different ways on fingers; games used to improve finger discrimination. Quick recognition of regular and irregular dot patterns, with larger quantities visualised in two parts (e.g. see 5 as 3 and 2). Children are taught to recognise quantities on 10-frame and base-5 number track.

To recite forwards and backwards number word sequences

Forwards and backwards number word sequences supported using songs and rhymes. Children continue number sequences starting from different numbers with some prior words in appropriate range e.g. 3, 4, 5, 6... or 24, 23... The transition over 10s boundaries supported by visuals. Number tracks used, with numbers hidden to add challenge as appropriate.

Add and subtract single-digit numbers

Addition built on experience of counting two groups. Opportunities provided for comparing quantities, using language more/less. Combining quantities in 10-frames and using Numicon encourage non-counting-in-ones strategies. Arrangement of sets counted also encourage counting on and calculation strategies.

Develop pre-multiplication and division concepts

Halves and doubles identified in a range of contexts, with a focus on equal halves. Shown on 10-frames and with Numicon.

Counting in 2s supported by colouring of 100-square

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Opportunities for 'repeat add' counting in context e.g. counting socks. Repeated addition shown with dice patterns. Grouping and sharing context tasks provided.

EYFS – Nursery (Addition)

To make comparisons between quantities.

Which group of sweets would you like? Why?

To use language such as 'more' and 'lots of'

Please may I have some more milk?

I have a lot of conkers.

To use the language of 'more' to compare a set of objects.

Isaac has more blocks than me.

My blocks

Isaac's blocks

To separate a set a group of 3 or 4 objects in different ways.

How many different ways can we put four teddies in two beds?

To respond to (and use) addition vocabulary in rhymes and games.

Elephant song

One elephant came out to play,
Upon a spider's web one day,
He found it such enormous fun,
That he called another elephant to come

Two elephants went out to play.... etc

Play

Can you put one more fish in the water tray? How many are there now?

To find the total number of objects in two groups by counting the all.

Three paper plates can be used to represent part, part whole. Children move the cars together into one group to find the total amount. (starting with 0-5)

To know when counting a group that the last number represents the amount.

There are seven in the group.

To find one more than a given amount.

One more than three is four

EYFS – Nursery (Subtraction)

To make comparisons between quantities.

Which group of cars would you like to play with? Why?

To use the language of fewer (less) to compare a set of objects.

I have fewer sweets than Jenny.

To separate a group of 3 or 4 objects in different ways (total still the same)

How many different ways can we put four teddies in two beds?

To know that a group of objects changes amount when something is taken away.

To respond to (and use) subtraction vocabulary in rhymes and games.

Five little ducks

Ten green bottles

5 Little Monkeys.

To find the total number of items after some are taken away by counting all of them.

To know that when counting the last number represents the quantity.

There are seven in the group.

EYFS – Reception (Addition)

To say the number that is one more than a given number.

One more than seven is eight.

Combine two or more quantities to find the total (combining)

To find one more than a group of up to five, then ten objects.

One more than five is six.

To count on when adding to a group (holding first number in head).

Four...

...five, six, seven

To add two sets of objects that are the same.

To add two sets of objects that are different.

Increase one quantity by a given amount to find the total (argumentation)

Maria has five sweets and she is given 3 more.
How many does she have in total?
(increase)

Records using marks they can interpret and explain.

To recognise and name + and = signs.

Add, more, plus, is equal to... altogether, total,

To read an addition number sentence

To read aloud $3 + 4 = 7$ knowing the correct vocabulary for the symbols + and =

To solve an addition number calculation.

Using objects to solve.

$$4 + 3 = 7$$

To match number cards to objects to make number sentences.

To know double s to 10.

$$1 + 1 = 2$$

$$4 + 4 = 8$$

$$2 + 2 = 4$$

$$5 + 5 = 10$$

$$3 + 3 = 6$$

EYFS – Reception (Addition)

To know number bonds of 5,6 and 10

Part, part whole: number bonds to 5.

Progression towards bar model

Adding objects to a group .

What is two more than 4?

Children can then use cubes, counting on from the greater number, to find the total number of cubes.

EYFS – Reception (Subtraction)

Relates subtraction to taking away.

3 toy cars

Take away 2

Leaves 1 toy car.

To find one less than a group of up to five, then ten objects.

1 less than 6 is 5

Recording using marks they can explain and apply meaning.

Using quantities and objects to subtract single-digit numbers and count on to find the answer.

$$5 - 3 = 2$$

$$4 - 3 = 1$$

To count backwards on a number line or counting stick.

EYFS – Reception (Subtraction)

To recognise and name - and = symbols.

Subtract, take away, minus left, part, whole, is equal to.

To read a subtraction calculation.

To read aloud $7 - 4 = 3$ knowing the correct vocabulary for the symbols - and =

To solve a subtraction calculation using objects.

$$7 - 4 = 3$$

To arrange a subtraction calculation.

$$7 - 3 = 4$$

To halve (an even group up to 12)

To know number bonds 5, 6, and 10

Part, part whole: number bonds to 5.

Begin to identify own mathematical problems based on own interests.

Progression towards bar model.

Chn to start by subtracting objects from a group.

Chn using cubes, counting back from the greater number to find the total number of cubes.

$$4 - 1 = 3$$

EYFS – Reception (Multiplication)

Children can lay out equal groups.

Can match equal groups.

EQUAL GROUPS
Each group has the same number of objects.
There are two groups, and each group has four turtles.

Recognise when they are given equal amounts.

Double objects

Double 1 is 2

To double quantities.

Double the cubes

To step count in 2s

To step count in 5s

To step count in 10s

To begin to relate doubles as repeated addition.

What is double 2?

$2 + 2 = 4$

To recognise odd and even numbers.

To count objects up to 20 in arrays.

EYFS – Reception (Division)

To share objects between two people equally

To group objects in to equal groups.

To halve equal numbers up to 12

To share an even group equally between 2.

To share an even group between 3 or 4.

To identify odd and even numbers

To count up to 20 in arrays.

To problem solve with grouping and sharing.

How should we put the seeds in these four pots?
Is there a way so that we'll have the same? Are there any left over?

Can we share out these sweets fairly? How shall we do it?
Between 2 people? What would happen if it was between 3 people?

Count out these stickers round the circle of children.
How many times will they go around? Are there any left over?

Addition

Year 1 to 6

Progression:

1. $O + O$ where the answer is less than 10
2. $O + O = 10$
3. $O + O$ crossing the tens boundary
4. $O + O$ crossing 10 using number facts to bridge
5. teen numbers + O not crossing 20
6. teen numbers + $O = 20$
7. teen numbers + O crossing 20
8. $TO + O$ (not crossing tens boundary)
9. $TO + O$ (crossing tens boundary)
10. multiple of 10 + multiple of 10
11. $O + O + O$ (not crossing tens)
12. $O + O + O$ (regrouping)
13. $TO +$ multiple of 10 (all)
14. $TO + TO$ (not crossing tens)
15. $TO + TO$ (crossing tens)
16. $TO + TO$ (crossing hundreds)
17. $TO + TO$ (crossing tens and hundreds)
18. $HTO + TO$ (no carrying)
19. $HTO + TO$ (one carry – first tens then hundreds)
20. $HTO + HTO$ (one carry – first tens then hundreds)
21. $TO + TO$ (two carries – tens and hundreds)
22. $HTO + TO$ (two carries – tens and hundreds)
23. $HTO + HTO$ (two carries – tens and hundreds) – into thousands
24. $ThHTO + HTO$
25. $ThHTO + ThHTO$
26. $O.t + O.t$ (in the context of measures and money)
27. $O.th + O.th$ (in the context of measures and money)
28. $O.t + O.t$
29. $O.th + O.th$
30. $O + O.t$
31. $TO + O.th$
32. Addition of numbers with any number of digits
33. Addition of two or more numbers with at least 4 digits and 3 decimal places
34. Addition of two or more numbers with at least 4 digits of various sizes and varied decimal places (e.g. $401.2 + 26.85 + 113$)

Progression:

1. $O + O$ where the answer is less than 10
2. $O + O = 10$
3. $O + O$ crossing the tens boundary
4. $O + O$ crossing 10 using number facts to bridge
5. teen numbers + O not crossing 20
6. teen numbers + $O = 20$
7. teen numbers + O crossing 20
8. $TO + O$ (not crossing tens boundary)
9. $TO + O$ (crossing tens boundary)
10. multiple of 10 + 10 (not crossing hundreds boundary)
11. 1 more than any given number to 100
12. $O + O + O$ (not crossing tens)
13. $O + O + O$ (regrouping)

Concrete:

Start with the bigger number and use the smaller number to make 10.
Use ten frames.

Adding multiples of 10

**Pictorial:**

$12 + 5 = 17$

Bar models

**Abstract:**

$4 + 6 = \underline{\quad}$ $10 = \underline{\quad} + 6$ $4 + \underline{\quad} = 10$

Examples of Mastery:

I know that 7 and 3 is 10. How can I find $8 + 3$? How could you work it out?

Sarah had 12 marbles and Paul had 5 marbles. How many marbles did Paul and Sarah have altogether.

Progression:

1. $TO + O$ (not crossing tens)
2. $TO + O$ (crossing tens)
3. multiple of 10 + multiple of 10
4. $O + O + O$ (not crossing tens)
5. $O + O + O$ (regrouping)
6. $TO +$ multiple of 10 (all)
7. $TO + TO$ (not crossing tens)
8. $TO + TO$ (crossing tens)
9. $TO + TO$ (crossing hundreds)
10. $TO + TO$ (crossing tens and hundreds)

Concrete:

Adding $TO + O$ using known facts, Place value counters and ten frames – show alongside pictorial representations

$17 + 5 = 22$

Use ten frame to make 'magic ten'

Children explore the pattern.

$17 + 5 = 22$

$27 + 5 = 32$

Using dienes to add $TO + TO$

$$40 + 7 + 20 + 5 = 72$$

Pictorial:

Use number line and bridge ten using part whole if necessary.

45

23

22

Abstract:

$$47$$

$$25 +$$

$$12 \quad (7 + 5)$$

$$60 \quad (40 + 20)$$

$$72$$

Examples of Mastery:

If I have 15 blocks how many ways I can I organise them?

$$\square + \square + \square = \square$$

$$\square + \square + \square = \square$$

$$\square + \square + \square = \square$$

Progression:

1. HTO + TO (no carrying)
2. HTO + TO (one carry – first tens then hundreds)
3. HTO + HTO (one carry – first tens then hundreds)
4. TO + TO (two carries – tens and hundreds)
5. HTO + TO (two carries – tens and hundreds)
6. HTO + HTO (two carries – tens and hundreds) – into thousands

Concrete and Pictorial Representation

Make both numbers on a place value grid using place value counters. Pupils could also draw this as a pictorial representation. Dienes could also be used.

This scaffolds pupils understanding with exchanging.

Bar models

372

247

125

Abstract

$$\begin{array}{r} 247 \\ +125 \\ \hline 12 \text{ (7 + 5)} \\ 60 \text{ (40 + 20)} \\ \hline 300 \text{ (200 + 100)} \\ 372 \end{array}$$

leading to

$$\begin{array}{r} 247 \\ +125 \\ \hline 372 \\ 1 \end{array}$$

Examples of Mastery:

$$\begin{array}{r} 247 \\ +125 \\ \hline 362 \end{array}$$

Is this answer to this equation correct?

Explain your answer

There are six 3-digit addition calculations shown below.

a) $\begin{array}{r} 124 \\ +233 \\ \hline \end{array}$	b) $\begin{array}{r} 644 \\ +172 \\ \hline \end{array}$	c) $\begin{array}{r} 366 \\ +277 \\ \hline \end{array}$
d) $\begin{array}{r} 579 \\ +221 \\ \hline \end{array}$	e) $\begin{array}{r} 791 \\ +163 \\ \hline \end{array}$	f) $\begin{array}{r} 567 \\ +233 \\ \hline \end{array}$

Which calculations have no carry digits?

Which calculations have a carrying digit only once?

Which calculations have a carrying digit twice?

Which calculation has the largest answer?

Which calculation has the smallest answer?

Progression:

1. ThHTO + HTO
2. ThHTO + ThHTO
3. O.t + O.t (in the context of measures and money)
4. O.th + O.th (in the context of measures and money)

Concrete and Pictorial Representation

As Year 3, continue to use place value counters and grids. Extend to using decimal place value counters

**Abstract:**

Pupils should be encouraged to check their answers using inverse operation

$$\begin{array}{r} 7151 \\ -4517 \\ \hline 2634 \end{array} \quad \begin{array}{r} 2634 \\ +4517 \\ \hline 7151 \end{array}$$

Examples of Mastery:

Week 1, Jo drove 3457 miles on Monday 5678 on Tuesday. Week 2, Jo drove 4567 miles on Monday and 2786 on Tuesday. Which week did Jo drive the most miles?

Fill in the empty boxes to make the equations correct.

$$7 \square 1 + \square 3 \square = 999$$

$$7 \square 1 + \square 3 \square = 1000$$

Progression:

1. O.t + O.t
2. O.th + O.th
3. O + O.t
4. TO + O.th

Concrete and Pictorial Representation

As Year 4, continue to use place value counters and grids.
Extend to using decimal place value counters

**Abstract**

Continue to develop the formal written method for addition with larger numbers (and decimal numbers) and with the addition of three or more numbers.

$$21848 + 1523 = 23371$$

$$\begin{array}{r} 21848 \\ + 1523 \\ \hline 23371 \end{array}$$

Use the formal written method for the addition of decimal numbers:

$$£154.75 + £233.82 = £388.57$$

$$\begin{array}{r} 154.75 \\ + 233.82 \\ \hline 388.57 \end{array}$$

Children extend their use of the compact column method to add numbers with at least four digits and decimals with careful consideration of missing place holders.

$$\begin{array}{r} \text{HTU.t h} \\ 257.80 \\ + 492.55 \\ \hline 750.35 \\ \text{1 1 1} \end{array}$$

Children may include zero place-holders to aid layout and understanding of place value.

Examples of Mastery:

When working with whole numbers, if you add 2 digit numbers together the answer cannot be a 4 digit number. Do you agree? Why?

Progression:

1. Addition of numbers with any number of digits
2. Addition of two or more numbers with at least 4 digits and 3 decimal places
3. Addition of two or more numbers with at least 4 digits of various sizes and varied decimal places (e.g. $401.2 + 26.85 + 113$)

Concrete and Pictorial Representation

As Year 5, continue to use place value counters and grids.
Continue to use decimal place value counters

Abstract:

$$\begin{array}{r} 81,059 \\ + 3,668 \\ \hline 15,301 \\ 20,551 \\ \hline 120,579 \\ \text{1 1 1 1} \end{array} \qquad \begin{array}{r} 23.361 \\ + 9.080 \\ \hline 59.770 \\ 1.300 \\ \hline 93.511 \\ \hline \text{2 1 2} \end{array}$$

Examples of Mastery:

This table shows the heights of three mountains.

Mountain	Height in metres
Mount Everest	8,848
Mount Kilimanjaro	5,895
Ben Nevis	1,344

How much higher is Mount Everest than the combined height of the other two mountains?

Can you use five of the digits 1 to 9 to make this number sentence true?

$$\square \square \cdot \square + \square \cdot \square = 31.7$$

Can you find other sets of five of the digits 1 to 9 that make the sentence true?

Subtraction

Year 1 to 6

Progression:

1. O - O (where answer is less than 10)
2. Subtracting from 10
3. teen number - O (where answer is 10 or more)
4. teens - O (going back over tens boundary)
5. Subtraction facts from 20
6. Subtracting 10 from multiple of 10
7. TO - O (not crossing tens)
8. TO - O (crossing tens)
9. TO - multiples of 10 = less than 100
10. TO - TO (not crossing tens)
11. TO - TO (crossing tens)
12. HTO - TO (no adjustments)
13. HTO - HTO (no adjustments)
14. Adjustment T to O
15. Adjustment H to T
16. HTO - TO (1 adjustments)
17. HTO - TO (2 adjustments)
18. HTO - HTO (2 adjustments)
19. HTO - HTO (extending to noughts in the ones)
20. ThHTO - ThHTO (extending to noughts in the ones)
21. O.t - O.t (in the context of measures and money)
22. O.th - O.th (in the context of measures and money)
23. TO.th - TO.th (in the context of measures and money)
24. O.t + O.t
25. O.th + O.th
26. TO.th - TO.th
27. Increasingly larger numbers and complex decimal values
28. Difference between 2 negative integers
29. Difference between positive and negative integers

Progression:

1. 0 - 0 (where answer is less than 10)
2. Subtracting from 10
3. teen number - 0 (where answer is 10 or more)
4. teens - 0 (going back over tens boundary)
5. Subtraction facts from 20
6. Subtracting 10 from multiple of 10

Concrete:

Use concrete objects, base 10, Numicon and tens frames to aid subtraction

Use physical objects, counters, cubes etc to show how objects can be taken away.

Use counters and move them away from the group as you take them away counting backwards as you go.

Begin to make links with the bar model, using a pictorial representation alongside concrete objects.

Use tens frames to work with numbers within ten and then extend to crossing the tens boundary.

Pictorial:

Images of pictures for pupils to cross out
Bar models, number lines and tens frames

**Abstract:**

$$10 - 6 = \underline{\quad} \quad 10 - \underline{\quad} = \quad 10 - \underline{\quad} = \quad \underline{\quad} - 4 = 6$$

Examples of Mastery:

Create 4 number sentences using these 3 numbers; 2 5 7

Progression:

1. TO - O (not crossing tens)
2. TO - O (crossing tens)
3. TO - multiples of 10 = less than 100
4. TO - TO (not crossing tens)
5. TO - TO (crossing tens)

Concrete:

Use a PV chart to show how to change a ten into ten ones, use the term 'take and make'

$$34 - 13 = 21$$

Use Dienes to show how to partition the number when subtracting without regrouping.

$$34 - 28$$

Use a bead bar or bead strings to model counting to next ten and the rest.

Pupils should be confident with exchanging tens into ten ones before being introduced to subtraction with crossing tens.

Pictorial:

$$43 - 21 = 22$$

**Abstract:**

Tens	Ones
6	3
-	2
2	8

$$85 - 21 = \boxed{\quad}$$

Examples of Mastery:

Look at the numbers in this addition.

$$\boxed{9} + \boxed{5} = \boxed{14}$$

Use the **same numbers** to make these correct.

$$\boxed{\quad} - \boxed{\quad} = \boxed{9}$$

$$\boxed{\quad} - 9 = \boxed{\quad}$$

12 children are on a bus.

8 children get off the bus.

Then 4 more children get off the bus.

Tick (✓) the number of children left on the bus.

8 2 0

Progression:

1. HTO - TO (no adjustments)
2. HTO - HTO (no adjustments)
3. Adjustment T to O
4. Adjustment H to T
5. HTO - TO (1 adjustments)
6. HTO - TO (2 adjustments)
7. HTO - HTO (2 adjustments)

Concrete and Pictorial Representation

Make both numbers on a place value grid using place value counters. Pupils could also draw this as a pictorial representation. Dienes could also be used.

$$234 - 179$$

This scaffolds pupils understanding with exchanging.

Bar models

372	
247	125

Abstract

$$\begin{array}{r} 1 \ 15 \\ 2 \ 5 \ 8 \\ - \ 7 \ 3 \\ \hline 1 \ 7 \ 5 \end{array}$$

Examples of Mastery:

Flo and Jim are answering a problem:

Danny has read 62 pages of the class book, Jack has read 43. How many more pages has Danny read than Jack?

Flo does the calculation $62 + 43$. Jim does the calculation $62 - 43$.

Who is correct?

Explain how you know.

Pupils might demonstrate using a bar model to explain their reasoning.

Progression:

1. HTO - HTO (extending to noughts in the ones)
2. ThHTO - ThHTO (extending to noughts in the ones)
3. O.t - O.t (in the context of measures and money)
4. O.th - O.th (in the context of measures and money)
5. TO.th - TO.th (in the context of measures and money)

Concrete and Pictorial Representation

As Year 3, continue to use place value counters and grids. Extend to using decimal place value counters

Continue to use bar models to demonstrate subtraction.

Abstract:

$$3625 - 1219$$

$$\begin{array}{r} 1 \ 15 \\ 3 \ 6 \ 2 \ 5 \\ - \ 1 \ 2 \ 1 \ 9 \\ \hline 2 \ 4 \ 0 \ 6 \end{array}$$

$$£7.93 - £4.86$$

$$\begin{array}{r} \text{U} \ . \ \text{t} \ \text{h} \\ 8 \ 13 \\ £ \ 7 \ . \ 9 \ 3 \\ - \ £ \ 4 \ . \ 8 \ 6 \\ \hline £ \ 3 \ . \ 0 \ 7 \end{array}$$

Examples of Mastery:

Identify the missing numbers in these bar models. They are not drawn to scale.

Select your own numbers to make this bar model correct.

Progression:

1. O.t + O.t
2. O.th + O.th
3. TO.th - TO.th

Concrete and Pictorial Representation

As Year 4, continue to use place value counters and grids. Extend to using decimal place value counters

**Abstract**

Continue to develop the formal written method for subtraction with three and four digit numbers (see Y4 guidance), returning to an expanded method and using base ten materials, if necessary.

When children are confident extend with larger numbers (and decimal numbers). Return to an expanded method, if necessary.

$$£154.75 + £233.82 = £388.57$$

$$\begin{array}{r} 154.75 \\ + 233.82 \\ \hline 388.57 \\ \hline \end{array}$$

Introduce subtraction of decimals, initially in the context of money and measures.

$$\begin{array}{r} \text{HTU.t h} \\ 257.80 \\ + 492.55 \\ \hline 750.35 \\ \hline \end{array}$$

Children may include zero place-holders to aid layout and understanding of place value.

Examples of Mastery:

True or False?

- $3999 - 2999 = 4000 - 3000$
- $3999 - 2999 = 3000 - 2000$
- $2741 - 1263 = 2742 - 1264$
- $2741 + 1263 = 2742 + 1264$
- $2741 - 1263 = 2731 - 1253$
- $2741 - 1263 = 2742 - 1252$

Explain your reasoning.

Using this number statement, $5222 - 3111 = 5223 - 3112$ write three more pairs of equivalent calculations.

Pupils should not calculate the answer to these questions but should look at the structure and relationships between the numbers.

Progression:

1. Refine year 5, increasingly larger numbers and complex decimal values
2. Difference between 2 negative integers
3. Difference between positive and negative integers

Concrete and Pictorial Representation

As Year 5, continue to use place value counters and grids. Continue to use decimal place value counters

Use algebra tiles to calculate the difference between positive and negative integers

$$\text{Add: } 5 + (-8)$$

**Solution.**

Use Algebra Tiles to combine. Remove zero pairs. Each pair consisting of a yellow tile and a red tile can be removed.

Use an empty number line to show differences between negative numbers, and positive and negative numbers.

What is the difference between 40 and -35?

**Abstract:**

$$\begin{array}{r} 0 \quad 9 \quad 1 \quad 3 \quad 1 \\ \cancel{1} \quad \cancel{10} \quad 5 \quad \cancel{4} \quad 1 \quad 9 \\ - \quad \quad 3 \quad 6 \quad 0 \quad 8 \quad 0 \\ \hline 6 \quad 9 \quad 3 \quad 3 \quad 9 \end{array}$$

Examples of Mastery:

Write different number sentences using the digits 2, 3, 5 and 8 before the equals sign, using:

- one operation
- two operations but no brackets
- two operations and brackets.

Multiplication

Year 1 to 6

Progression:

1. Concrete objects and pictorial representations
2. Arrays
3. Repeated addition
 1. Practical apparatus
 2. Number lines
 3. Bar models
4. Number partitioning
 1. Dienes / Base 10
 2. Using known facts (e.g. $27 \times 3 = (20 \times 3) + (7 \times 3)$)
5. Compact method TO x O and HTO x O
6. Multiplying decimals through repeated addition and known facts
 1. Practical apparatus (Place value counters)
 2. Number lines
 3. Bar models
7. Compact method TO x TO and HTO x TO and beyond

Progression:

1. Use repeated addition of equal groups using apparatus
2. Use repeated addition of equal groups using pictorial representations
3. Multiples of 2
4. Multiples of 5
5. Multiples of 10
6. Investigate patterns when counting in 2s, 5s and 10s.

Concrete:

Repeated addition and equal groups.

Pictorial:**Abstract:**

Count in multiples of a number aloud.

Write sequences with multiples of numbers. Include missing numbers in the sequence

2, 4, 6, 8, 10

5, 10, 15, 20, 25, 30

Examples of Mastery:

Ben had 5 football stickers. His friend Tom gave him 5 more, how many does he have altogether?

'How many cherries are there altogether?'

Observe how pupils count the objects. Do they count in twos, fives etc. or do they count in ones?

**Progression:**

1. Multiplication as equal groups – *building on Y1*
2. $2 \times$ table
3. $5 \times$ table
4. $10 \times$ table
5. Multiplying by 2, 5 and 10
6. Word problems

Concrete:**Pictorial:**

$$2 \times 4 = 8$$

$$4 \times 2 = 8$$

Use of arrays to show commutativity.

$$5 + 5 + 5 = 15$$

Using an array $5 \times 3 =$

15		
5	5	5

Abstract:

$$5 + 5 + 5 = 15$$

$$5 \times 3 = 15$$

$$3 + 3 + 3 + 3 + 3 = 15$$

$$3 \times 5 = 15$$

Examples of Mastery:

Anna has 3 boxes of cakes. Each box contains 5 cakes. How many cakes does she have altogether? Show how you worked this out

True or false?

$$5 \times 4 = 4 \times 5$$

$$5 \times 4 = 10 \times 2$$

$$5 \times 4 = 2 \times 10$$

Explain your reasoning.

What do you notice?

Which has the most biscuits:

4 packets of biscuits with 5 in each packet, or

3 packets of biscuits with 10 in each packet?

Explain your reasoning.

Progression:

- 3× tables
- 4× tables
- 8× tables
- Multiplying by 3, 4 and 8
- Word problems
- Multiples of 10 x ones
- TO × O using base 10
- TO × O expanded x column (no regrouping)
- TO × O expanded x column (regrouping)
- TO × O condensed recording

Concrete:

Multiply each piece using known tables.
12 x 4

Multiply the tens and ones by 4

$$40 + 8 = 48$$

Pictorial:**Abstract**

$$27 \times 3$$

$$\begin{array}{r} 27 \\ 3 \times \\ \hline 21 \\ 60 + \\ \hline 81 \end{array}$$

$$20 \times 3 = 60$$

$$7 \times 3 = 21$$

$$60 + 21 = 81$$

20	7
60	21
81	

Examples of Mastery:

Circle three numbers that add to make a multiple of 4: 11 12 13 14 15 16 17 18 19

Find the missing digits.

$$\begin{array}{r} 2 \square \\ \times 8 \\ \hline 176 \end{array}$$

$$\begin{array}{r} 2 \square \\ \times \square \\ \hline 112 \end{array}$$

$$\begin{array}{r} 1 \square 4 \\ \times \square \\ \hline 736 \end{array}$$

Progression:

- 6× tables
- 7× tables
- 9× tables
- Multiplying by 0
- HTO × O (no regrouping)
- HTO × O (regrouping)

Concrete and pictorial

These can be drawn out for a pictorial representation.

Abstract

$$327$$

$$\underline{4}$$

$$\times 28 \quad (4 \times 7)$$

$$80 \quad (4 \times 20)$$

$$\underline{1200} \quad (4 \times 300)$$

$$1308$$

	3	2	7
x			4
<hr/>			
	1	3	0
		1	2

Examples of Mastery:

Place one of these symbols in the circle to make the number sentence correct: >, < or =.

Explain your reasoning.

8×50	<input type="radio"/>	50×8
8×50	<input type="radio"/>	80×5
300×3	<input type="radio"/>	5×200

Progression:

1. Multiply whole numbers (including TO) by 10, 100 and 1 000
2. Multiply decimals by 0
3. TO \times TO using long multiplication

Concrete:

As Year 4, extending to using Place value counters to multiply tenths by 0 e.g. 0.6×3

**Pictorial:****Abstract:**

13
18 x
 24 (8 x 3)
 80 (8 x 10)
 30 (10 x 3)
100 (10 x 10)
234

Examples of Mastery:

A 50 cm length of wood is cut into 4 cm pieces.

How many 4 cm pieces are cut and how much wood is left over?

Fill in the blanks to represent the problem as division:

$$\square \div \square = \square \text{ remainder } \square$$

Fill in the blanks to represent the problem as multiplication:

$$\square \times \square + \square = 50$$

Progression:

1. Whole numbers \times 0 using short multiplication
2. TO \times TO using long multiplication
3. HTO \times TO using long multiplication

Concrete:

As Years 4 and 5, continuing to use Place value counters (including decimals)

Pictorial:

Continue to use the bar model, where applicable.

Use pictorial representations of Place value counters, where applicable.

Abstract:**Long multiplication**

24×16 becomes

$$\begin{array}{r} 24 \\ \times 16 \\ \hline 144 \\ 240 \\ \hline 384 \end{array}$$

Answer: 384

124×26 becomes

$$\begin{array}{r} 124 \\ \times 26 \\ \hline 744 \\ 2480 \\ \hline 3224 \end{array}$$

Answer: 3224

124×26 becomes

$$\begin{array}{r} 124 \\ \times 26 \\ \hline 744 \\ 2480 \\ \hline 3224 \end{array}$$

Answer: 3224

$$\begin{array}{r} 3.19 \\ \times 8 \\ \hline 25.52 \end{array}$$

Examples of Mastery:

Find numbers to complete these number sentences.

$$\begin{array}{lll} 736 \div 23 = \square & \square \times 100 = 2400 & \square \times 100 = 10 \times \square \\ 7360 \div 230 = \square & 25 \times \square = 200 & 25 \times \square = 4 \times \square \\ 230 \times 24 = \square & 23 \times \square = 161 & 23 \times \square = 161 \times \square \\ 240 \times 23 = \square & 24 \times \square = 168 & 24 \times \square = 168 \times \square \\ 1668 \div 8 = \square & 161 \div \square = 23 & 161 \div \square = 23 \times \square \\ 2085 \times 8 = \square & \square \div 25 = 9 & \square \div 25 = 9 \times \square \end{array}$$

It is correct that $273 \times 32 = 8736$. Use this fact to work out:

- 27.3×3.2
- 2.73×32000
- $873.6 \div 0.32$
- $87.36 \div 27.3$
- $8736 \div 16$
- $4368 \div 1.6$

Division

Year 1 to 6

Progression:

1. Division as sharing
2. Division as grouping
3. Arrays
4. Known facts (times tables)
5. Division with remainders
 1. Practical apparatus (Place value counters)
 2. Arrays
 3. Bar models
6. Short division $TO \div O$
 1. Practical apparatus (Place value counters)
 2. Bar models
7. Short division $HTO \div O$ and beyond
8. Placing the quotient e.g. $207 \div 3$
9. Noughts in the quotient (final digit, final digit is nought and then remainder, middle digit is nought) e.g. $6630 \div 3$, $9992 \div 3$, $6321 \div 3$
10. Dividing with decimals using known facts (e.g. $4.2 \div 6$)
11. Long division
12. Rounding up or down depending on context
13. Converting remainders to fractions

Progression (Non statutory)

1. Division as sharing
2. Division as grouping - grouping a known quantity of pictorial representations
3. Using arrays to support concrete methods
4. Using multiples of 2,5,10 (alongside multiplication)

Concrete:

I have 10 cubes, can you share them equally in 2 groups?

Pictorial:

Children use pictures or shapes to share quantities.

Use of arrays as a pictorial representation for division.

$15 \div 3 = 5$ There are 5 groups of 3.

$15 \div 5 = 3$ There are 3 groups of 5.

**Abstract:**

Share 4 buns between two people.

$$4 \div 2 = 2$$

Examples of Mastery:

I can see 10 wheels. How many bicycles?

How else could 20 sweets be put into bags so that every bag had the same number of sweets? How many bags would be packed each time?

Anna has 50 pencils.

She puts 5 pencils in each party bag.

How many bags does she put pencils in?

 bags

True or False? If I share 10 apples, between 5 pupils, they will get 5 apples each.

Progression:

1. Sharing apparatus into equal groups– *building on Y1*
2. Grouping a known quantity of pictorial representations – *building on Y1*
3. Introducing \div sign, writing number sentence
4. Dividing by 2, 5, 10
5. Word problems
6. Begin to link multiplication and division fact- inverse

Concrete:

Divide quantities into equal groups.

Use cubes, counters, objects or Place value counters to aid understanding.

Bead strings used alongside number lines

Link division to multiplication by creating an array and thinking about the number sentences that can be created.

e.g

$$15 \div 3 = 5$$

$$5 \times 3 = 15$$

$$15 \div 5 = 3$$

$$3 \times 5 = 15$$

Pictorial:**Abstract:**

$$15 \div 5 = 3$$

Divide 15 into 5 groups. How many are in each group?

Examples of Mastery:

Two friends want to buy some marbles and then share them out equally between them.

They could buy a bag of 13 marbles, a bag of 14 marbles or a bag of 19 marbles.

What size bag should they buy so that they can share them equally?

What other numbers of marbles could be shared equally?

Explain your reasoning.

Progression

1. Dividing by 3, 4 and 8 (follow the below routine for each)
2. $TO \div O$ (using pictorial images- no remainder, no carrying) e.g. $69 \div 3$
3. $TO \div O$ (using Place value counters - no remainder, carrying) e.g. $72 \div 3$
4. $TO \div O$ (using Place value counters - remainder, carrying) e.g. $47 \div 3$
5. $TO \div O$ (written method – following steps above)

Concrete:

Use Place value counters to divide using the bus stop method alongside $42 \div 3 =$

Start with the biggest Place value, we are sharing 40 into three groups. We can put 1 ten in each group and we have 1 ten left over.

We exchange this ten for ten ones and then share the ones equally among the groups. How many in each group?

Pictorial:

Draw dots and group them to divide an amount and clearly show a remainder.

Use bar models to show division with remainders.

**Abstract:**

$$3 \overline{) 23} \rightarrow 3 \overline{) 24} \rightarrow 3 \overline{) 15}^2 \rightarrow 3 \overline{) 69} \rightarrow 3 \overline{) 210}$$

Examples of Mastery:

Roger is laying tiles.
He has 84 tiles altogether.
How many complete rows of tiles can he make?

Progression:

1. Dividing by 3, 4, 8, 6, 7, 8- continuing from year 3 and following on with tables knowledge (follow the below routine for each)
2. Known facts for multiples of $10 \div O$ (e.g. $60 \div 3$, $80 \div 4$)
3. $HTO \div O$ (using pictorial images- no remainder, no carrying) e.g. $396 \div 3$
4. $HTO \div O$ (using base ten- no remainder, no carrying) e.g. $484 \div 4$
5. $HTO \div O$ (using base ten- no remainder, carrying) e.g. $452 \div 4$
6. $HTO \div O$ (using base ten- remainder, carrying) e.g. $494 \div 4$
7. $HTO \div O$ (written method – following steps above)
8. Noughts in the quotient (final digit, final digit is nought and then remainder, middle digit is nought) e.g. $630 \div 3$, $92 \div 3$, $321 \div 3$

Concrete:

Use Place value counters to divide using the bus stop method alongside $369 \div 3 =$

Share 300 between 3 groups.; Share 60 between 3 groups; Share 9 between 3 groups

How many in each group?

**Carrying**

$$126 \div 3 =$$

Start with the biggest Place value, we are sharing our hundreds (100) between three groups. We cannot do this so we exchange for ten tens. Now we have 12 tens. Now share 12 tens between 3 groups
Share 6 between 3 groups

Solving word problems

There are 21 boys in a class.
There are 3 times as many boys as girls in the class.
How many girls are there in the class?

**Pictorial:**

As Year 3, use bar models to show division, including remainders.

Abstract:

$$3 \overline{) 132} \rightarrow 4 \overline{) 113} \rightarrow 4 \overline{) 123}^2$$

Examples of Mastery:

Fill in the missing numbers in this multiplication pyramid.

Look at the relationships between the questions below.

$$8 \overline{) 12} \quad 4 \overline{) 24} \quad 8 \overline{) 24} \quad 16 \overline{) 12}$$

Progression

- Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000 (also in mental)
- ThHTO ÷ O (written method- no remainder, no carrying) e.g. $6396 \div 3$
- ThHTO ÷ O (written method- no remainder, carrying) e.g. $7875 \div 7$
- ThHTO ÷ O (written method- remainder, carrying) e.g. $9462 \div 8$
- Placing the quotient e.g. $207 \div 3$
- Noughts in the quotient (final digit, final digit is nought and then remainder, middle digit is nought) e.g. $6630 \div 3$, $9992 \div 3$, $6321 \div 3$

Concrete:

Use Place value counters to divide using the bus stop method alongside (no carrying)

$$6396 \div 3$$

Share 6000 between 3 groups; Share 300 between 3 groups; Share 90 between 3 groups; Share 6 between 3 groups
How many in each group? What is the total?

Carrying

$$1869 \div 3 =$$

Start with the biggest Place value, we are sharing our thousands between three groups. We cannot do this so we exchange for ten hundreds. Now we have 18 hundreds. Now share 18 tens between 3 groups.

Extend with dividends that will yield 0 as a place holder in the quotient (e.g. $1824 \div 3 = 608$)

Pictorial:

As Years 3 and 4, use bar models to show division, including remainders.

Abstract:

$$3 \overline{) 2132} \rightarrow 7 \overline{) 1125} \rightarrow 8 \overline{) 1182} \text{ r}6 \rightarrow 3 \overline{) 1069}$$

Examples of Mastery:

A 1 m piece of ribbon is cut into equal pieces and a piece measuring 4 cm remains.

What might the lengths of the equal parts be?

In how many different ways can the ribbon be cut into equal pieces?

$$7 \overline{) 1178} \text{ r} \square$$

$$7 \overline{) \square 12549}$$

Progression:

- ThHTO ÷ TO (written method- no remainder, no carrying) e.g. $2436 \div 12$
- ThHTO ÷ TO (written method- no remainder, carrying) e.g. $3198 \div 26$
- ThHTO ÷ TO (written method- remainder, carrying) e.g. $9427 \div 23$
- Interpreting remainders as fractions (or rounding if appropriate)
- Missing box problems
- Dividing numbers with up to two decimal places

Concrete:

As Year 5 but extend with decimal Place value counters.

$$\text{e.g. } 1242 \div 4$$

Share 1000 between 4 groups; cannot be done so we exchange for 10 hundreds. We now have 12 hundreds which can be shared between 4 groups.

4 tens can be shared between four groups but 2 ones cannot. We exchange for 20 tenths. Now we can share this between 4 groups – we have 5 tenths.

Pictorial:

As Years 3 and 4, use bar models to show division, including remainders and decimals.

Abstract:

Long division:

$$13 \overline{) 181} \begin{array}{r} 13 \overline{) 2357} \\ \underline{13} \\ 105 \\ \underline{104} \\ 17 \\ \underline{13} \\ 4 \text{ (remainder)} \end{array}$$

Converting remainders to fractions:

$$15 \overline{) 505} \text{ r}5 \rightarrow \frac{5}{15} \rightarrow \frac{1}{3}$$

Examples of Mastery:**BUS PROBLEM**

There were 3 times as many girls as boys on a bus.

There were twice as many children as adults.

There were 36 persons on the bus.

How many girls were there on the bus?

Bus

Ratio chdn/adults

Ratio chdn

36 people

Vocabulary

Year 1 vocabulary
continued on next slide

New maths vocabulary for year 1							
Number and place value	Addition and subtraction	Multiplication and division	Measure	Geometry (position and direction)	Geometry (properties of shape)	Fractions	General/problem solving
Number	Number bonds, number line	Odd, even	Full, half full, empty	Position	Group, sort	Whole	Listen, join in
Zero, one, two, three to twenty, and beyond	Add, more, plus, make, sum, total, altogether	Count in twos, threes, fives	Holds	Over, under, underneath, above, below, top, bottom, side	Cube, cuboid, pyramid, sphere, cone, cylinder, circle, triangle, square	Equal parts, four equal parts	Say, think, imagine, remember
None	Inverse	Count in tens (forwards from/backwards from)	Container	on, in, outside, inside	Shape	One half, two halves	Start from, start with, start at
Count (on/up/to/from/down)	Double, near double	How many times?	Weigh, weighs, balances	around, in front, behind	Flat, curved, straight, round	A quarter, two quarters	Look at, point to
Before, after	Half, halve	Lots of, groups of	Heavy, heavier, heaviest, light, lighter, lightest	Front, back	Hollow, solid		Put, place, fit
More, less, many, few, fewer, least, fewest, smallest, greater, lesser	Equals, is the same as (including equals sign)	Once, twice, three times, five times	Scales	Before, after	Corner (point, pointed)		Arrange, rearrange
Equal to, the same as	Difference between	Multiple of, times, multiply, multiply by	Time	Beside, next to, Opposite	Face, side, edge		Change, change over
Odd, even	How many more to make...?, how many more is...than...?, how much more is..?	Repeated addition	Days of the week: Monday, Tuesday, etc.	Apart	Make, build, draw		Split, separate
Pair		Array, row, column	Seasons: spring, summer, autumn, winter	Between, middle, edge, centre			Carry on, continue, repeat , what comes next?
Units, ones, tens		Double, halve	Day, week, month, year, weekend	Corner			Find, choose, collect, use, make, build
Ten more/less			Birthday, holiday	Direction			Tell me, describe, pick out, talk about, explain, show me
			Morning, afternoon, evening, night, midnight	Journey			Read, write, record, trace, copy, complete finish
			Bedtime, dinnertime, playtime	Left, right, up, down, forwards,			
			Today, yesterday, tomorrow				

Vocabulary

Year 1 vocabulary
continued on next slide

Digit	Subtract, take away, minus	Share, share equally	Before, after	backwards, sideways			end
Numeral			Next, last	Across			Fill in, shade, colour, tick, cross, draw, draw a line between, join (up), ring, arrow
Figure(s)	How many fewer	Group in pairs, threes, etc.	Now, soon, early, late	Close, far, near			
Compare	is...than...? how much less is...?	Equal groups of	Quick, quicker, quickest, quickly, fast, faster, fastest, slow, slower, slowest, slowly	Along, through			Cost
(In) order/a different order		Divide, divided by, left, left over	Old, older, oldest, new, newer, newest	To, from, towards, away from			Count, work out, answer, check same
Size			Takes longer, takes less time	Movement			number(s)/different number(s)/missing number(s)
Value			Hour, o'clock, half past	Slide, roll, turn, whole turn, half turn			Number facts, number line, number track, number square, number cards
Between, halfway between			Clock, watch, hands	Stretch, bend			Abacus, counters, cubes, blocks, rods, die, dice, dominoes, pegs, peg board
Above, below			How long ago?.. how long will it be to...?, how long will it take to...?, how often?				Same way, different way, best way, another way
			Always, never, often, sometimes, usually				In order, in a different order
			Once, twice				Not all, every, each
			First, second, third, etc.				
			Estimate, close to, about the same as, just over, just under				
			Too many, too few, not enough, enough				
			Length, width, height, depth				

Vocabulary

			<p>Long, longer, longest, short, shorter, shortest, tall, taller, tallest, high, higher, highest</p> <p>Low, wide, narrow, deep, shallow, thick, thin</p> <p>Far, near, close</p> <p>Metre, ruler, metre stick</p> <p>Money, coin, penny, pence, pound, price, cost, buy, sell, spend, spent, pay, change, dear(er), costs more, costs less, cheaper, costs the same as</p> <p>How much?, how many?</p> <p>Total</p>

Vocabulary

New maths vocabulary for year 2						
Number and place value	Measure	Geometry (position and direction)	Geometry (properties of shape)	Fractions	Data/statistics	General/problem solving
Numbers to one hundred Hundreds Partition, recombine Hundred more/less 	Quarter past/to m/km, g/kg, ml/l Temperature (degrees)	Rotation Clockwise, anticlockwise Straight line Ninety degree turn, right angle	Size Bigger, larger, smaller Symmetrical, line of symmetry Fold Match Mirror line, reflection Pattern, repeating pattern	Three quarters, one third, a third Equivalence, equivalent	Count, tally, sort Vote Graph, block graph, pictogram, Represent Group, set, list, table Label, title Most popular, most common, least popular, least common	Predict Describe the pattern, describe the rule Find, find all, find different Investigate

Existing vocabulary from Year 1 should also be covered.

Year 1 Vocabulary

Vocabulary

New maths vocabulary for year 3							
Number and place value	Addition and subtraction	Multiplication and division	Measure	Geometry (position and direction)	Geometry (properties of shape)	Fractions	Data/statistics
Numbers to one thousand	Column addition and subtraction	Product	Leap year	Greater/less than ninety degrees	Horizontal, perpendicular and parallel lines	Numerator, denominator	Chart, bar chart, frequency table, Carroll diagram, Venn diagram
		Multiples of four, eight, fifty and one hundred	Twelve-hour/twenty-four-hour clock	Orientation (same orientation, different orientation)		Unit fraction, non-unit fraction	
		Scale up	Roman numerals I to XIII	Compare and order		Axis, axes	
						Tenths	Diagram

New maths vocabulary for year 4						
Number and place value	Multiplication and division	Measure	Geometry (position and direction)	Geometry (properties of shape)	Fractions and decimals	Data/statistics
Tenths, hundredths	Multiplication facts (up to 12x12)	Convert	Coordinates	Quadrilaterals	Equivalent decimals and fractions	Continuous data
Decimal (places)			Translation	Triangles		
Round (to nearest)	Division facts		Quadrant	Right angle, acute and obtuse angles		Line graph
Thousand more/less than			Inverse			
Negative integers	Derive		Perimeter and area			
Count through zero						
Roman numerals (I to C)						

Existing vocabulary from Years 1 and 2 should also be covered.

Year 1 Vocabulary

Year 2 Vocabulary

Vocabulary

New maths vocabulary for year 5						
Number and place value	Addition and subtraction	Multiplication and division	Measure	Geometry (position and direction)	Geometry (properties of shape)	Fractions, decimals and percentages
Powers of 10	Efficient written method	Factor pairs Composite numbers, prime number, prime factors, square number, cubed number Formal written method	Volume Imperial units, metric units	Reflex angle Dimensions	Regular and irregular polygons	Proper fractions, improper fractions, mixed numbers Percentage Half, quarter, fifth, two fifths, four fifths Ratio, proportion

New maths vocabulary for year 6							
Number and place value	Addition and subtraction	Multiplication and division	Geometry (position and direction)	Geometry (properties of shape)	Fractions, decimals and percentages	Algebra	Data/statistics
Numbers to ten million	Order of operations	Order of operations Common factors, common multiples	Four quadrants (for coordinates)	Vertically opposite (angles) Circumference, radius, diameter	Degree of accuracy Simplify	Linear number sequence Substitute Variables Symbol Known values	Mean Pie chart Construct

Existing vocabulary from Years 1, 2 3 and 4 should also be covered.

Year 1 Vocabulary

Year 2 Vocabulary

Years 3 and 4 Vocabulary
